

# OPERATE<sup>IN</sup> THE BLACK

## WE'VE GOT SAFETY COVERED!

At Black and Company, we understand the constant pressure safety leaders face: meeting rigorous OSHA compliance, optimizing process and personnel safety, and driving continuous improvement objectives within a complex environment.

Our dedicated Safety Team doesn't just supply equipment; we partner with you to engineer a truly world-class safety program. We achieve this by providing industry-leading solutions, compliance training, and proven deliverables designed for measurable results. Through this specialized support, we enable our partners to reduce avoidable incidents, maintain stringent regulatory compliance, proactively manage risk, and improved overall operational productivity—all while optimizing the total cost of operational safety.

Specializing in assisting teams with the identification and elimination of Serious Injury & Fatality (SIF) generators within your facility footprint, everything we do is a focused effort to fundamentally elevate your safety culture, team member behaviors, and overall program compliance. *Let us help you move from mitigating risk to operating consistently, reliably, and safely in the Black.*
